

NatWest

Canary Wharf Fitout

LOCATION

Canary Wharf

DURATION

12 Weeks

SCALE

New Flagship
Branch

VALUE

£1.5m

This project involved the creation of a new flagship NatWest branch in the famous London landmark, Canary Wharf.

Works included the fit out of a single-floor base shell to create a 24-hour automated lobby, a new banking hall, consultation areas and staff facilities. The innovative design called for the installation of a number of unique features, including a bespoke mapping wall, aluminium feature fins, oak timber wall panelling and doors and LED lighting systems.

DELIVERY

The project had to be fast-tracked to meet a revised deadline and our team completed the fitout work within an incredible six weeks. To do this, they re-scheduled all of the jobs from the original 12-week programme. Using tight programming and careful planning, they delivered the project on time and to a very high quality.

The project was completed in a busy and complex live environment. The team rose to the challenge this posed and excelled at managing the site, working closely with the Canary Wharf Management Team, the NatWest Project Team and all suppliers. Effective communication and careful contract supervision ensured project success.
