2026

ESG – Emissions Report 2025

Carbon Inventory

Aligning to the standards set by the GHG Protocol, we endeavour to collect emissions data from across the business, combining a mixture of emission factors against business activities and spend-based metrics where necessary. We collect and report emissions across Scope1 , 2, & 3 categories as detailed below.

Our emission reporting period runs 1st January to 31st December and figures are reported as soon as they are available, reviewed, and externally assured through ISO 14064-1 standards.

Emissions Scope & Category	2025 Emissions Total / Clarification (tCO2e)
Scope 1	715.99
Scope 2	129.426 – Location-based 0 – Market-based
Scope 3: Category 1 Purchased Goods and Services	64,664.03
Scope 3: Category 2 Capital Goods	Non identified outside of Purchased Goods & Services
Scope 3: Category 3 Fuel and Energy-related Activities	220.36
Scope 3: Category 4 Upstream Transportation and Distribution	1729
Scope 3: Category 5 Waste Generated in Operations	96.43
Scope 3: Category 6 Business Travel	669.09
Scope 3: Category 7 Employee Commuting	34.45
Scope 3: Category 8 Upstream Leased Assets	Non identified outside of Scope 1 & 2
Scope 3: Category 9 Downstream Transportation and Distribution	Not identified as relevant to business operations
Scope 3: Category 10 Processing of Sold Products	Not identified as relevant to business operations
Scope 3: Category 11 Use of Sold Products	Not identified as relevant to business operations
